

## KinderSign – How to Change the Font Size on an Android Tablet

Your Android tablet uses the default font. You can modify its size (and style) at any time.

- A** Tap the **Settings** icon typically found on the tablet home screen. Depending on the type of tablet you are using, the icon might look different and be located at a different place.

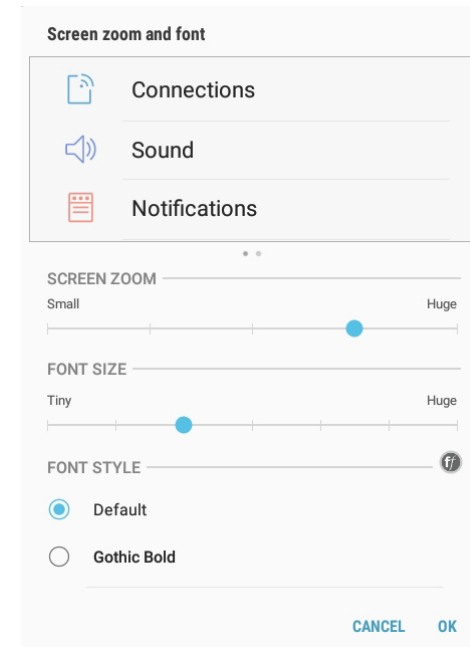

- B** Tap **Display**, then tap **Screen zoom and font**.

- C** A pop-up labeled **Screen zoom and font** appears. It is here that you can adjust the screen size, font size, and change the font type.

- D** Slide the **Font Size** blue indicator. The upper section is a preview where you can see the changes you are making. It will adjust as you move the blue indicator until you reach the desired font size.

- E** Tap **OK** to accept the new size. Press the Home button to return to the tablet home screen.
